

281—41.908(256B,282) Accountability. The responsible agency shall provide special education and related services in accordance with the individual's IEP; but the agency, teacher, or other person is not held accountable if an individual does not achieve the growth projected in the annual goals and objectives of the IEP, so long as the individual's IEP was reasonably calculated to confer education benefit and was implemented. Nothing in this rule or this chapter shall be construed to create a right of action against any individual.
