A BILL FOR

An Act relating to the practice of barbering.

Be It Enacted by the General Assembly of the State of Iowa:

This is a Companion Bill; for complete text see House File 73.

EXPLANATION OF SENATE FILE 93

The purpose of section 1 is to protect the public health against spread of infectious and contagious disease of the hair and scalp and implement the enforcement of the existing law by closing the loophole that presently exists where the unlicensed practitioner and his customers conspire to defeat prosecution by denying payment of compensation or resort to the subterfuge of calling it an "independent gift."

The purpose of section 2 is to upgrade the profession to the end that it may render increasingly better service to the general public.
